

CHENOA

Inter
seed

Chenoa is a high yielding medium early potato variety with a long and uniform tuber shape and a very good suitability for processing French Fries. Because of very good storage characteristics Chenoa is well suited for long term storage.

LOW INPUT

SOME INTERESTING FACTS ABOUT CHENOA:

- High yielding with reduced nitrogen input
- Very low susceptibility for damage and bruises
- Excellent suitability for long term storage
- Good tolerance for periods of drought and heat
- Not susceptible for growth cracks
- Highly tolerant against soft rot
- Resistance against nematodes Ro1,4 (9); partially Ro 2,3

Maturity: medium early. **Tuber Shape:** uniform, voluminous and long tubers with rather shallow eyes, light- yellow flesh- and skin color. **Processing:** excellent suitability for French Fries production. **Yield:** very high.
