

# FRANCIS

**FRANCIS is a very early potato variety with a light yellow flesh color. Presprouted and covered with foil it can be harvested at the end of June with excellent frying colors. Because of the long to long oval tuber shape and early high dry matter contents it is ideally suited for early processing in Fast Food quality.**

## Some interesting facts about FRANCIS

- Resistance against nematodes Ro 1, 4 (9)
- Presprouted and covered by foil will allow very early harvest
