

# JORIS

Inter  
seed

**Joris** is a medium-early potato variety that is ideally suited for crisps production due to its round tuber shape and good frying qualities. Joris also has very good nematode and wart disease resistance. The low susceptibility to damage makes it perfect for long term storage.

## SOME INTERESTING FACTS ABOUT JORIS:

- Resistant to nematodes Ro 1,4; 2,3; 5
- Resistant to nematodes Pa 2,3
- Resistant to wart disease Fysio 1; 2; 6
- Rapid early growth
- Low susceptibility to damage
- Good frying color
- Stable dry matter

**Maturity:** medium early. **Tuber Shape:** round oval with light yellow flesh and skin colour.

**Processing:** excellent suitability for the production of crisps, very low acrylamide content.

**Yield:** high.
