

MONTIS

Inter
seed

Montis is a very high yielding, medium early variety with a yellow flesh color. Due to its very long uniform tubers and excellent frying texture it is well suited for the production of French Fries.

LOW INPUT

SOME INTERESTING FACTS ABOUT MONTIS:

- Consistently very high yield with low nitrogen input
- High Tolerance against Phytophthora infestans
- Good tolerance to periods of drought and heat
- High number of big sized tubers
- Very high resistance to hollow heart
- Homogenous tuber shape and size
- Well suited for long term storage with excellent frying colors
- Resistance against nematodes Ro 1, 4 (9)
- Resistance against wart disease Fysio 1 (10)

Maturity: medium early. **Tuber Shape:** long shape with shallow eyes, yellow skin and flesh color.

Processing: Ideally suited for the processing of French Fries, mealy cooking type.

Yield: very high.
